AYS Brake Co.Ltd is one of the leading professional manufacturer and exporter of brake adjusters for automotive industry (All European Commercial Vehicle Applications) since 1966 in Konya/Turkey.

AYS Brake Co.Ltd have specialized in manufacturing of Automatic Brake Adjusters, newly patented S-ABA(self-setting) Full Automatic Brake Adjusters, 32 mm U-lock Brake Adjusters, Manual Brake Adjusters and Repair kits within context of OEM and aftermarket.

In 2008 it moved to the new factory which has 10.000 square meter closed area, 25.000 square meter field settled in Konya Industrial Area.

At this factory with qualified personnel who works with total quality management concept, by using latest technology machines and applying strict quality control at all stages of production, the products are being manufactured with high quality and reasonable prices.

Our firma profili
Company

1996

Sektöründe yeniliklerin öncüsü olarak faaliyetlerini sürdüren Aydınsan Fren Cırcırları Ltd.Şti, 1966 yılında Konya'da kurulmuştur. Kurulduğu tarihten 1990'lara kadar Man,Mercedes vb. kamyon ve otobüslere yönelik yedek parça üreten AYDINSAN 1990 ılı yılların sonunda ulusal ve global düzeyde piyasa analizleri yaparak, konjonktürün dillendirdiği uzmanlaşma ve derinleşme felsefesini çok iyi algılayarak özümsemiş ve faaliyet alanını ticari araçlar için fren sistemleri olarak belirlemiştir.

Mekanik Fren Ayar Kolu imalatı ile başlayan bu heyecan ve atılım dolu yeni serüven, 2000 yılında Otomatik Fren Ayar Kolu üretimi ile devam edegelmiş ve kısa bir süre içinde ülkemizde Fren Ayar Kolu alanında seri üretimi gerçekleştiren ilk firma olarak adını ve kalitesini tüm dünyaya duyurarak başarısını taçlandırmıştır.

2008 yılında Konya Organize Sanayi Bölgesindeki 10.000 metre kare kapalı 25.000 metre kare açık alana sahip yeni fabrikasına taşınmıştır.

Bu yeni fabrikada, nitelikli personelimiz ile en son teknoloji tezgahlar kullanılarak ve üretimin tüm aşamalarında sıkı bir kalite kontrol sistemi uygulanarak, mevcut ürünlerin gövde ve mekanizmaları güçlendirilerek, yüksek kalite ve uygun fiyatlarda ürünler üretilmektedir.

MISSION

Continuous focus on improving the market price and quality of the company.

Kuruluşumuzun pazar değerini müşterilerin gözündeki değerini, köklü kültürümüzün iç ve dış değerini en yüksek seviyeye çıkarmaya sürekli odaklanmaktadır...

VISION

Achieving stable growth and high performance with keeping up some quality level.

"İstikrarlı büyümeyi ve yüksek performansı kalitemizden ödün vermeden gerçekleştirmek."

Quality Kalite Politikası Policy

At AYDINSAN all activities are maintained with process approach and customer focus. To produce high quality and economic priced products which meet customer requirements, we established EN ISO 9001:2000 quality management system that is maintained and continuously improved. Our quality management system was certified by TÜV CERT (Almanya) and GHOST (Rusya). The necessary procedure has been started to be awarded for "KBA" certificate.

Our slack adjusters' quality approved by TSE (Turkish Standards Institute) with TSEK certificate. Our slack adjusters are subjected functional and durability tests according to the requirements of SAE J 1462 standard. So that to supply products to OEM firms and axle producers, our studies for establishing TS ISO 16949 quality management system are being continued. To ensure continuity of quality and improvement the QMS, capability of our personnel who work with total quality concept are continuously measured and subjected to necessary trainings.

AYDINSAN'da tüm faaliyetler süreç yaklaşımli ve müşteri odakli olarak yürütölmektedir. Müşteri ihtiyaçlarını tam olarak karşılayan ürünleri kaliteli ve ekonomik olarak üretmek için, şirketimizde **DIN EN ISO 9001:2000** standardına göre kalite yönetim sistemi kurulmuş ve etkin şekilde uygulanmaktadır. Kalite yönetim sistemimiz **TUV CERT** (Almanya) ve **GHOST** (Rusya) tarafından sertifikalandırılmıştır. KBA (Almanya) belgesi almak için şirketimiz girişimlerde bulunmuştur.

Fren circirlarımızın kalitesi TSE tarafından **TSEK** belgesi ile onaylanmıştır. Ayrıca fren circirları **SAE J 1462** standardına göre; fonksiyon, aşırı sıcaklık şartlandırması, korozyon direnci, otomatik ayar fonksiyonu dayanıklılığı, düşük uygulama basıncı performansı ve dayanıklılık testlerine tabi tutulmaktadır. OEM firmalarına ürün tedarik etmek amacıyla **TE ISO 16949** kalite yönetim sistemi kurma çalışmalarımız devam etmektedir. Bu kapsamda **FMEA**, **SPC** uygulamaları yapılmakta olup, **APQP**, **PPAP** ve **MSA** çalışmaları başlatılmıştır.

AYDINSAN carries out production by ensuring mass production requirements using latest technology machines.

Necessity of our "Make correct at first time and continuously" principal is that utmost importance has given to mass production, trained personnel and nearly all machining operations are carried out on CNC machines.

To ensure rapid production and same quality level, home made special fixtures and tools are used.

AYDINSAN sahip olduğu en son teknoloji tezgahlarda seri üretim şartlarını sağlayarak imalat yapmaktadır. Üretim; Talaşlı İmalat hattı, Sac Parça İmalat Hattı, Boyahane, Montaj Hattı ve Son Kontrol ve Test bi rimlerinde gerçekleştirilmektedir.

Benimsediğimiz "İlk defada ve sürekli olarak doğru yap" ilkimiz gereği, imalatı otomasyona önem verilmiş ve talaşlı imalatın tamamı CNC tezgahlarda yapılmaktadır.

İmalatın hızlı ve aynı işleme kalitesinde yapılmasını sağlamak için, tasarımı ve imalatı kendimize ait olan özel takımlar ve özel aparatlar kullanılmaktadır.

Tüm imalat operasyonları nitelikli personel tarafından yapılır ve operasyonun devamınca operatörler tarafından ara kontrol, kalite kontrolcüler tarafından devriye muayenelerine tabi tutulur.

Resource & Development

AR&GE

Our R&D department is being studied to design new products, develop quality of present products and apply new technologies to manufacturing processes. to design new products, to.

R&D department also designs special tools, fixtures, instruments and observes manufacturing of these equipment.

These studies are carried on by qualified engineers using AUTO CAD and PRO ENGINEER software. The completed designs are verified with simulation before starting production to prevent time and material losses.

In 2008, design of 32 mm U lock brake adjuster and automatic slack adjuster with 180° cover angle have been made and launched to the market.

Ar-Ge birimimiz yeni ürünlerin tasarımı, mevcut ürünlerimizin geliştirilmesi ve yeni teknolojilerin imalata adaptasyonu konusunda çalışmalar yapmaktadır.

*Bu çalışmalar, nitelikli mühendis ve teknisyenler tarafından **AUTO CAD** ve **PRO ENGINEER CAD/CAM** yazılımları kullanılarak yapılır. 2008 yılında tam otomatik fren circirını ve 32mm U kilit otomatik fren circirının tasarımları yapılarak piyasaya sunulmuştur.*

Since all production processes identified and planned its needed less lead time for the accepted orders. Normal delivery time is 15 working days for the on going products and 30 days for new products (they are stated in the catalogue but did not produced yet).

Our delivery performance is good. We believe that to deliver the orders in stated delivery time is important as quality of the product.

Our company has appreciated by our customers due to delivering the punctual in time.

Sipariş üzerine üretim yapılmaktadır. Sık giden ürünlerin sevkiyatı 15 iş günüdür, yeni ürünlerin sevkiyatı ise 30 iş günüdür. (katalogda yer alan ancak üretilmeyen)

Firmamızın sevkiyat performansı iyidir. Biz zamanında ürün tesliminin kaliteli ürün üretmek kadar önemli olduğuna inanıyoruz.

Firmamız müşterileri tarafından zamanında ürün teslimi konusunda takdir almıştır.

WHAT IS BRAKE ADJUSTER?

FREN CIRCIRI NEDİR?

Fren havayla çalışır. Fren körüğünün içine dolan hava körüğü harekete geçirir. Harekete geçen körük fren cırcırının harekete geçmesini sağlar. Aynı zamanda harekete geçen S kolu fren bloklarını harekete geçirir. Böylece fren yapılmış olur. Balata aşındıkça fren cırcırının hareketi fren yapmaya yetiştirmez. Burada devreye otomatik fren cırcırı girer. Otomatik fren cırcırı, kampana ile balata arasında meydana gelen boşluğu ayarlar ve güvenli fren yapılmasını sağlar. Fren cırcırı kolları araçlar için uygun kol şekilleriyle ayarlanabilir olup, uygun kol şekilleri ile beraber S-Kam Frenlerinin uygulandığı her yerde kullanılabilir.

Otomatik fren cırcırı, otomatik olarak balata ile kampana arasındaki boşluğun sabit kalmasını sağlar.

Fren körüğünün strokunu kısa tutar, böylece kullanılan hava sarfiyatı az olur.

Otomatik fren cırcırı, fren dinamizmini daha düzenli kılar. Frenleme çabuk ve emniyetli olup, bütün tekerleklerde frenlemeyi düzenli kılar.

Fren cırcırının otomatik ayar mekanizması kapalıdır, rutubet, toz ve darbelerle karşı korunmuştur.

Araçın fren dengesi otomatik fren cırcırlarıyla ile sağlanır.

The brake is driven with air. The air filled in the brake blower activates the blower. Being activated by the air, the blower drives the Brake Adjuster. Being co-activated, the S-arm drives the Brake Blocks. Thus, braking process has been completed when the brake linings have become worn and torn in time, the movement of Brake Adjusters do not reach enough for braking. At this point, Automatic Brake Adjuster imposes itself into the operation circuit. Automatic Brake Adjuster adjusts the clearance distance formed between the drum and linings and secures a safe braking result. The brake adjusters are adjustable for different variety of vehicles, by using suitable arm forms, and thus, they can be used wherever S-Camshafts are utilized.

Automatic Brake Adjusters do automatically secures that the clearance between the linings and drum is kept fixed and unchanging. They keep the stroke of blower shorter, resultantly air consumption becomes less.

Automatic Brake Adjusters cause braking dynamism to function more regularly.

Braking effect is rapid and safe. Braking on all wheels are achieved in safe arrangement and harmony.

Automatic Adjustment mechanism of the Brake Adjusters are covered for protection against dust end external knocks and strokes.

The braking balance of the vehicle is maintained by brake adjusters.

Automatic brake adjusters

“otomatik fren circırları”

Automatic brake adjuster (AA 1 type)

Automatic brake adjuster is used in drum brake systems and installed between brake chamber and S- cam shaft. It automatically adjusts the clearance between the drum and lining. Thus; service need, out of order time of the vehicle and air consumption are decreased.

Durable, torque adjustment free and extended warranty Automatic brake adjuster (AA2 type)

Adjustment mechanism of the brake adjuster is well protected against corrosion, dirt and shock. In our new automatic brake adjusters, disc springs have been used instead helical spring. Thus compression system forced and need of torque adjustment omitted. (AA2 type)

Otomatik fren circırı (AA1 tipi)

Otomatik fren circırı havalı kampana fren sisteminde, hava körüğü ile S- kam mili arasına bağlanır. Boşluk hissetme prensibine göre çalışan otomatik fren circırının, bütün tip ağır ticari taşıtlar için binlerce farklı modeli mevcuttur.

Güçlendirilmiş, tork ayarı gerektirmeyen ve garanti süresi uzatılmış otomatik fren circırı (AA2 tipi)

- 21 **Control arm / Kontrol kapağı**
- 22 **Countersunk Screw / Vida**

“tam otomatik fren circırları”

Newly improved full automatic brake adjuster's locking arm can be installed in every position.

Also many types are unified into one type. This situation increases productivity, decreases stock costs and ensure easy availability of the products in the market.

Müşteri talepleri doğrultusunda yeni geliştirmiş olduğumuz 180° kilit sacı açılı tam otomatik fren circirının kilit sacı , her açılal pozisyonda takılabilir. Bu özellik takma sırasında hizalama ihtiyacını ortadan kaldırarak montajı kolaylaştırır ve montaj hatalarından dolayı circirın uygun çalışmama olasılığını önler.

Bu circirda pazardaki diğ er markalardan farklı olarak, otomatik fren circirlerimizde uzun yıllar kullanılan ve tasarımı ispatlanmış kavrama sistemi kullanılmıştır.Böylece fren circirinin performansı ve dayanıklılığı artırılmıştır.

32 mm U LOCK
AUTOMATIC BRAKE ADJUSTERS
32'lik U KİLİTLİ OTOMATİK FREN CIRCIRLARI

PART LIST

**32 U-lock automatic
brake adjusters**

"32'lik U kilitli otomatik fren circını"

PART LIST / PARÇA LİSTESİ

- 1 Body / Gövde
- 2 Warm gear / Sonsuz dişli
- 3 Warm screw / Sonsuz vida
- 4 Rod / Mil
- 5 Compression washer / Baskı pulu
- 6 Compression spring / Baskı yayı
- 7 Clutch lock-lower / Kavrama kilidi alt
- 8 Clutch housing-lower / Kavrama kovani alt
- 9 Clutch spring / Kavrama yayı
- 10 Clutch housing-upper / Kavrama kovani-üst
- 11 Clutch lock-upper / Kavrama kilidi-üst
- 12 Washer / Kesik pul
- 13 Lock washer / Kilit pulu
- 14 M6 screw / M6 vida
- 15 Plug / Tapa
- 16 Dust cover / Toz kapağı
- 17 M8 screw / M8 vida
- 18 Cover plate / Kapak sacı
- 19 Rivet / Perçin
- 20 Bush / Burç

32 U-lock automatic brake adjusters

“32’lik U kilitli otomatik fren circını”

32 mm U lock Brake Adjuster

In respect to customer requests, in addition to AA1 types which are being produced for long years, 32 mm U lock automatic brake adjuster was improved and submitted to market. Thus our customers requests have been met.

32 lik U kilitli Otomatik Fren Circırı

Müşteri talepleri doğrultusunda yıllardan beri üretilmekte olan AA1 tiplerine ilave olarak, 32 lik U kilit tipi otomatik fren circırı geliştirilerek, bu tip fren circırı kullanan müşterilerimizin talepleri de karşılanmıştır.

description for automatic

manual brake adjusters “mekanik fren circırları”

Manual brake adjuster is used in drum brake systems and installed between brake chamber and S- cam shaft. When lining to drum clearance has increased, adjustment should be made manually.

This requirement increase service need , out of order time and air consumption of the vehicle . Additionally; if the clearance adjustment is not performed in time, brake security is decreased.

Mekanik fren circırı kampana fren sisteminde, hava körüğü ile S-kam mili arasına bağlanır.

Fren balataları ile kampana arasındaki boşluğu sabit tutmak için, circırın düzenli aralıklarla ayarlanması gerekir.
